

# What is TSA?

The Technology Student Association (TSA) is a national organization of students engaged in STEM (science, technology, engineering, and math). It is a Department of Education encouraged activity that can enhance a technology education program, provide extra-curricular opportunities and build important 21st-century skills for students, and add an exciting dimension to the teaching profession for advisors.

By becoming TSA members, students get the opportunity to network with students on a national level with common interests, develop leadership skills, earn scholarships, explore career paths they may be interested in through a variety of competitive events, and potentially win trophies to bring back home with them! A complete list of events that students can compete in can be found on the national website, for both middle and high school students.

Visit the Florida TSA website ([www.floridatsa.org](http://www.floridatsa.org)) on a regular basis for consistently updated valuable information on conferences, discussion forums, advisors, board member and state officer links, etc. This site is designed to promote Florida TSA throughout the state of Florida.

We also invite you to visit the National TSA website at [www.tsaweb.org](http://www.tsaweb.org). This website provides general information, monthly memos through the School Scene publication, promotional items through Pitsco, and conference and competitive event information and updates.
